# Han Trainer Pro - Installation Instructions for MAC

Han Trainer Pro will run under MAC OS X Version 10.14 (Mojave) as well as BigSur.
*If one of the following steps is incorrect or unclear, of if you require assistance, feel free to contact the author anytime at info@hantrainerpro.de.*

1. **Download Han Trainer (Pro) for MAC** from https://www.hantrainerpro.com/download (of from the full version link that was provided to you after payment)
The download consists of one zip file.

2. Open the program „Finder" and **find the ZIP file in your Download directory**.
3. **Unpack** the ZIP file

screenshot 1: unpacked ZIP file (here: demo version)

4. Since you obtained the software from your website hantrainerpro.de and not from the Apple Store, you can **not simply run it by double-clicking**, but will be warned from potentially harmful software.
Instead, **right-click** the file (or keep the CTRL button on your keyboard pressed while clicking).In the context menu that appears, click „**open**".
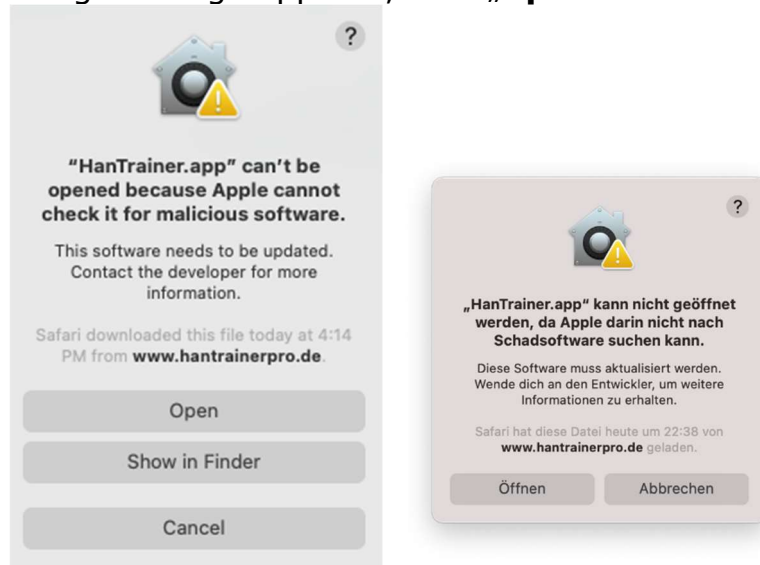

screenshot 2: contect menu (after right-clicking the App)

5. If the following message appears, please confirm with „**OK**" and **repeat step 4**.

Screenshot 3: Warning from apps that have been downloaded from the internet

6. If the following message appears, click „**open**"

Confirm that ou wish to open this file by left-clicking „**open**".

7. **Done.**
Next time you wish to launch the program, you can do so simply by double-clicking it.

8. (Recommedation if you downloaded the program:) **Save** the entire Han Trainer Pro directory on a CD or on an USB stick.
